**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-6, 8-15, 17, 20, 21, 44, and 62-76 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Providing the claimed "battery charging circuitry" for setting the IMD to a zero volt mode would require undue experimentation because of the minimal guidance provided by the specification and drawings. The only mention that the examiner could locate of any circuitry related to this concept is in paragraph 0067, but this paragraph fails to describe what a "trickle charge mode" is, what "front-end switches" are, or how these elements are related to the implanted system. As this "battery charging circuitry" appears to be specific to this claimed invention, an artisan of ordinary skill could not look to the state of the prior art or the direction given by the inventor to practice the reasonable scope of this claim. See *In re Wands*, 858 F.2d 731, 737 (Fed. Cir. 1988).

3. Claims 1-6, 8-15, 17, 20, 21, 44, and 62-76 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a

way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner was unable to find support in the originally-filed disclosure for the combination of elements including "battery charging circuitry" with the claimed functionality.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-6, 8-15, 17, 20, 21, 44, and 62-76 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear which element or elements comprise the "battery charging circuitry." Because this term has not been used in the disclosure, the metes and bounds of which elements make up this circuitry is impossible to discern.
